Patient_01 · seed 42 · esophagus crop coverage audit
Actual model crop covers 100.00% of reference voxels; 0 reference voxels lie outside

Reference (solid) Prediction (dashed) Actual model crop (white)

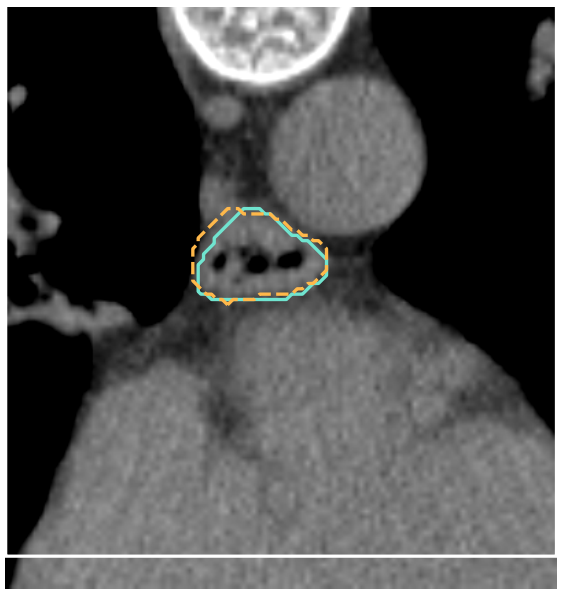

Native CT and model crop
Q25% · z=96

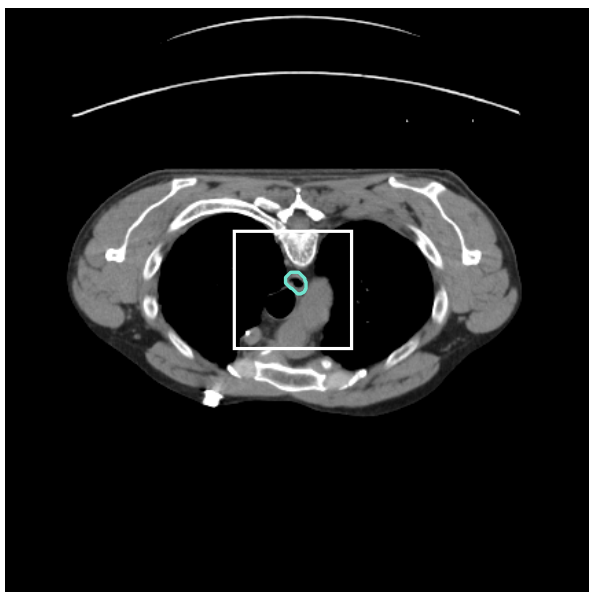

3-slice ENet
Q25% · z=96

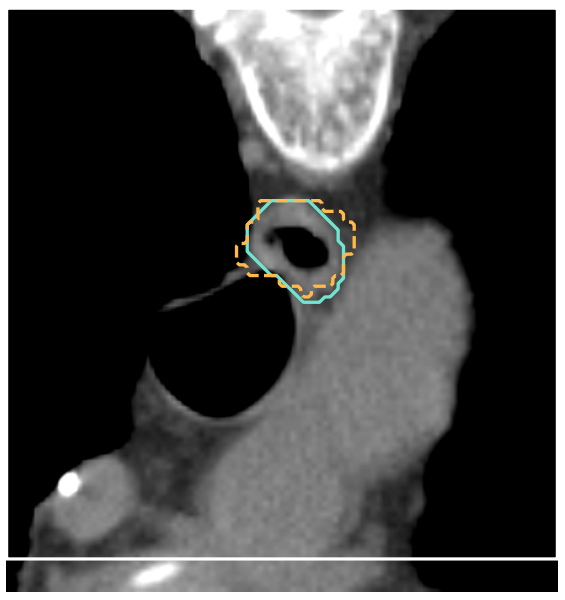

3-slice ENet + refinement
Q25% · z=96

Native CT and model crop
Q75% · z=153

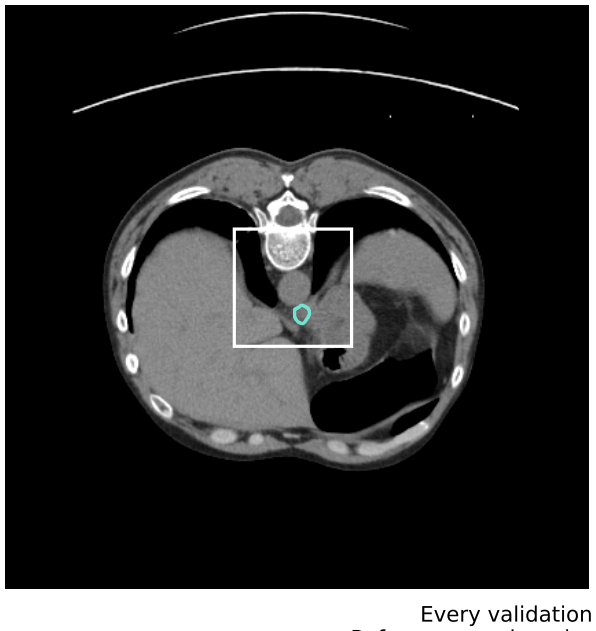

3-slice ENet
Q75% · z=153

3-slice ENet + refinement
Q75% · z=153

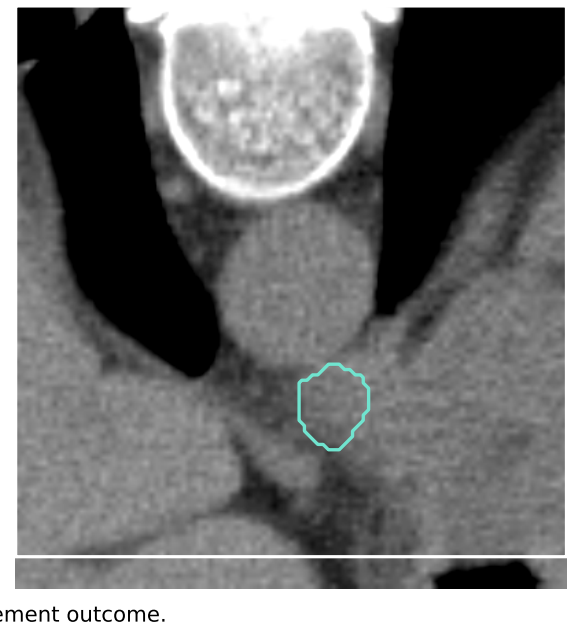

Native CT and model crop
Lowest crop coverage (first tie) · z=68

3-slice ENet
Lowest crop coverage (first tie) · z=68

3-slice ENet + refinement
Lowest crop coverage (first tie) · z=68

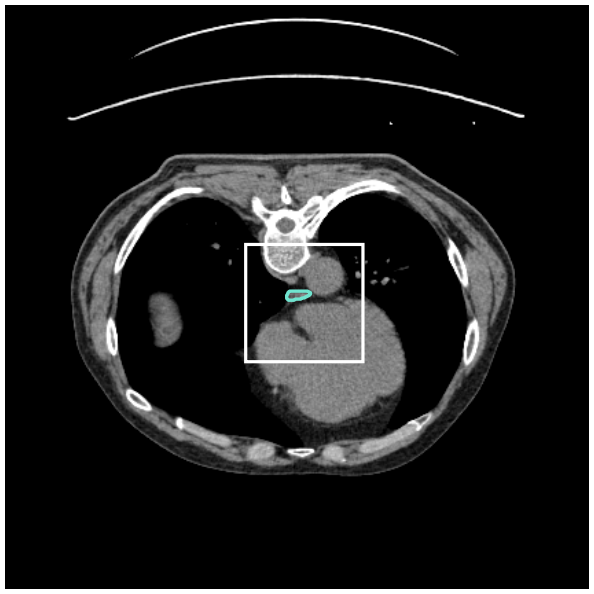

Every validation patient is shown. The final row audits the weakest crop coverage, not the best refinement outcome.
Reference masks select display views and measure coverage only. Model crops were derived from frozen 3-slice ENet predictions.
The historical filename is retained for links; this audit does not presume that a crop failed.

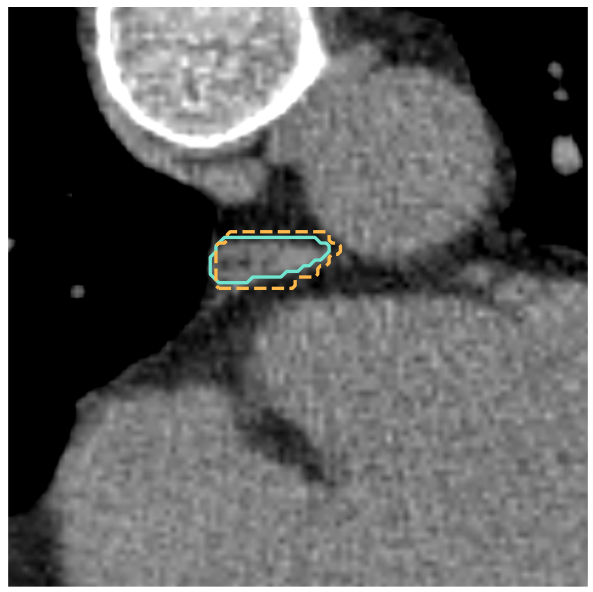

Patient_13 · seed 42 · esophagus crop coverage audit
Actual model crop covers 100.00% of reference voxels; 0 reference voxels lie outside

Reference (solid) Prediction (dashed) Actual model crop (white)

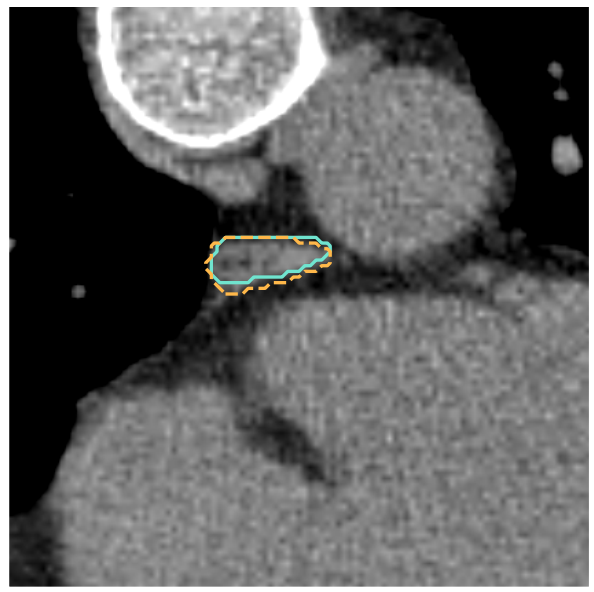

Native CT and model crop
Q25% · z=57

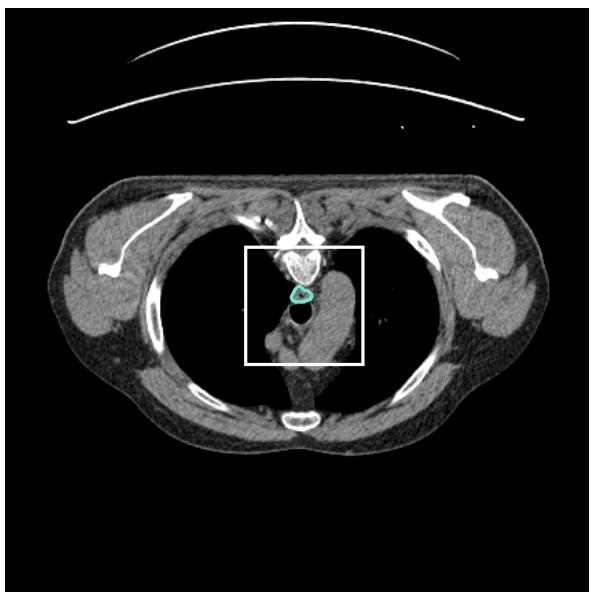

3-slice ENet
Q25% · z=57

3-slice ENet + refinement
Q25% · z=57

Native CT and model crop
Q75% · z=115

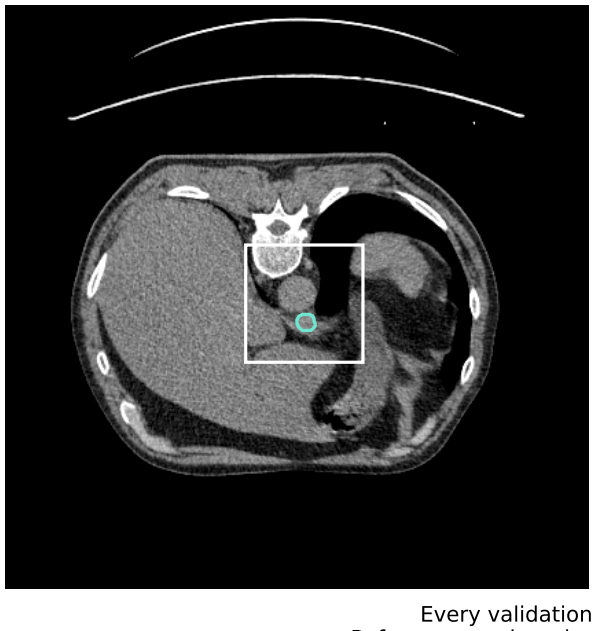

3-slice ENet
Q75% · z=115

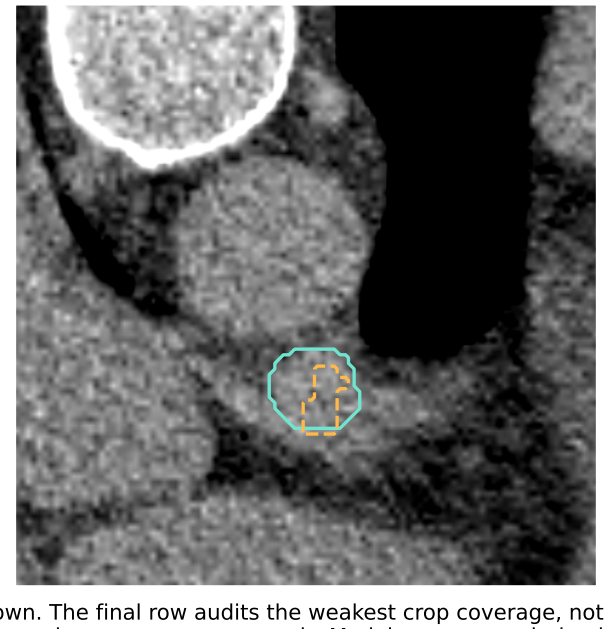

3-slice ENet + refinement
Q75% · z=115

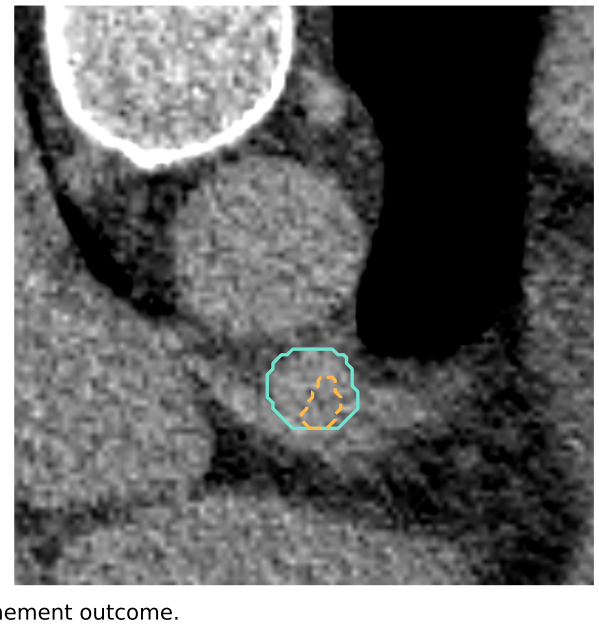

Native CT and model crop
Lowest crop coverage (first tie) · z=28

3-slice ENet
Lowest crop coverage (first tie) · z=28

3-slice ENet + refinement
Lowest crop coverage (first tie) · z=28

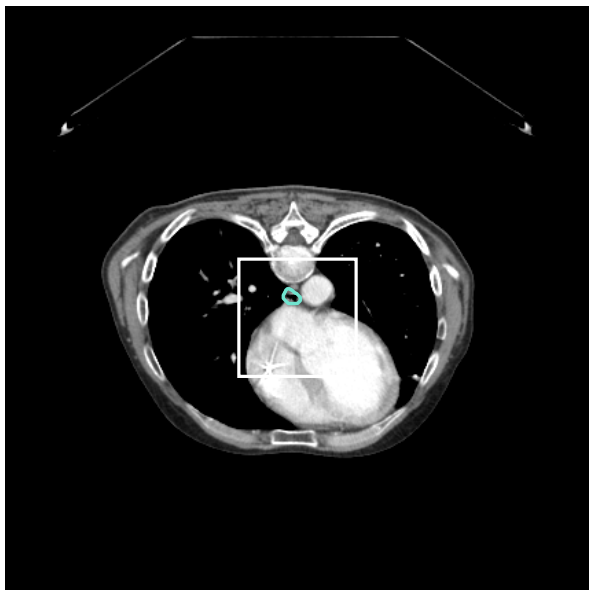

Every validation patient is shown. The final row audits the weakest crop coverage, not the best refinement outcome.
Reference masks select display views and measure coverage only. Model crops were derived from frozen 3-slice ENet predictions.
The historical filename is retained for links; this audit does not presume that a crop failed.

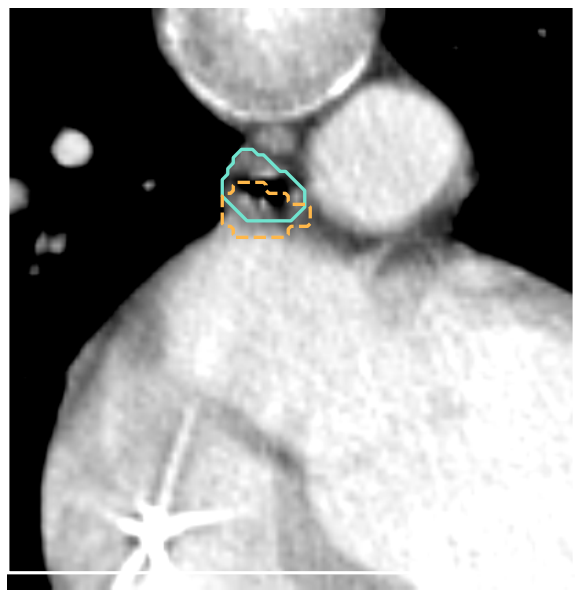

Patient_22 · seed 42 · esophagus crop coverage audit
Actual model crop covers 100.00% of reference voxels; 0 reference voxels lie outside

Reference (solid) Prediction (dashed) Actual model crop (white)

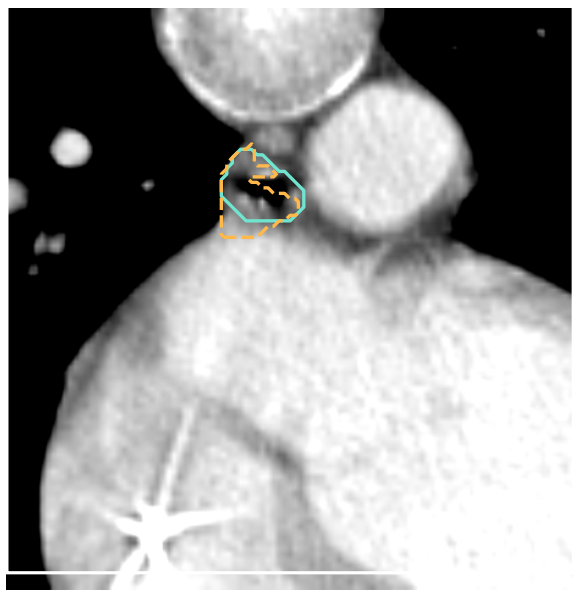

Native CT and model crop
Q25% · z=93

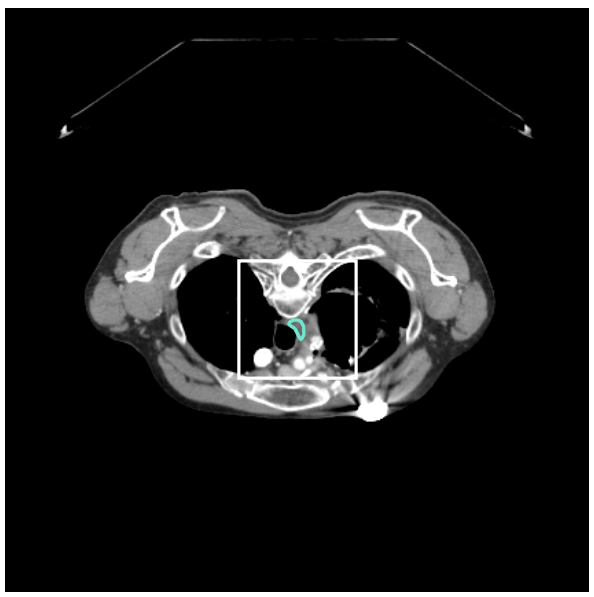

3-slice ENet
Q25% · z=93

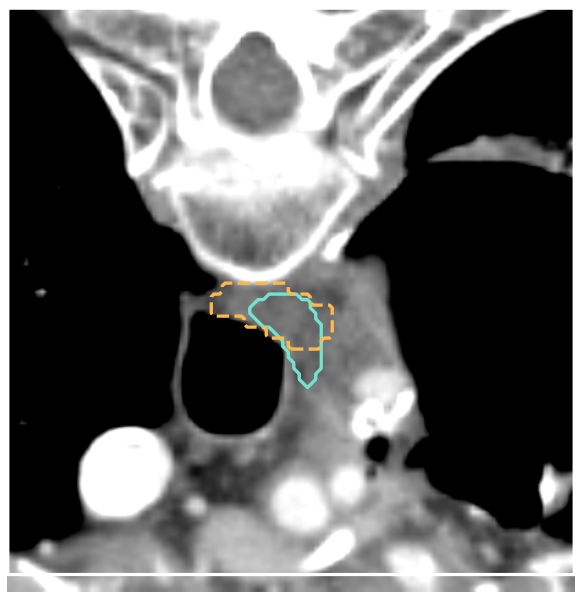

3-slice ENet + refinement
Q25% · z=93

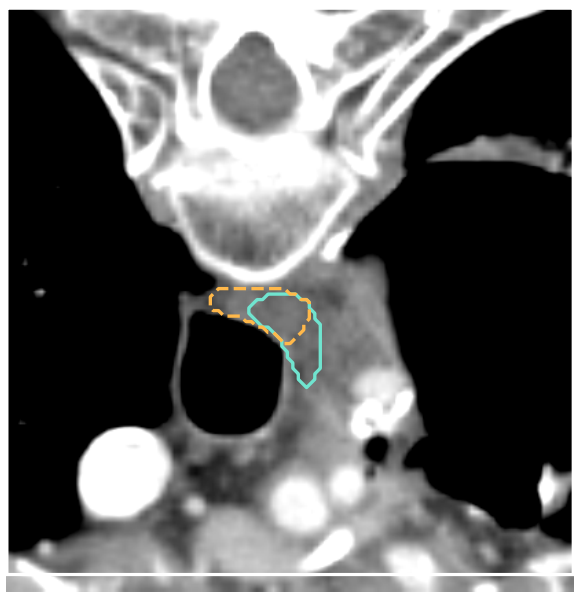

Native CT and model crop
Q75% · z=138

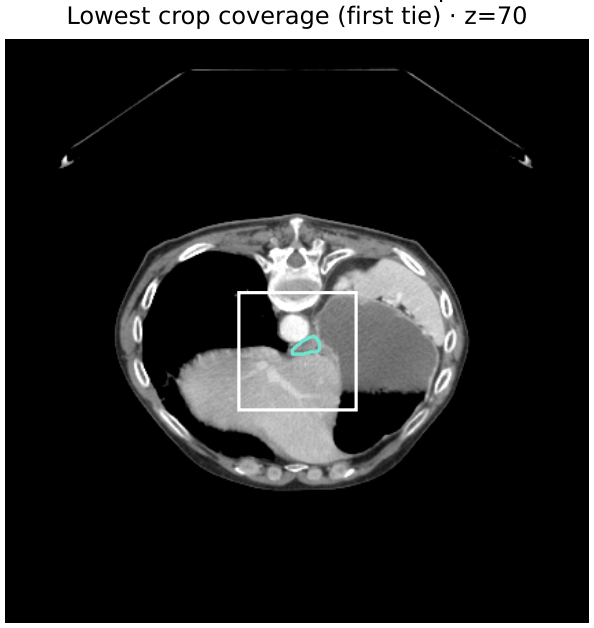

3-slice ENet
Q75% · z=138

3-slice ENet + refinement
Q75% · z=138

Native CT and model crop
Lowest crop coverage (first tie) · z=70

3-slice ENet
Lowest crop coverage (first tie) · z=70

3-slice ENet + refinement
Lowest crop coverage (first tie) · z=70

Every validation patient is shown. The final row audits the weakest crop coverage, not the best refinement outcome.
Reference masks select display views and measure coverage only. Model crops were derived from frozen 3-slice ENet predictions.
The historical filename is retained for links; this audit does not presume that a crop failed.

Patient_28 · seed 42 · esophagus crop coverage audit
Actual model crop covers 100.00% of reference voxels; 0 reference voxels lie outside

Reference (solid) Prediction (dashed) Actual model crop (white)

Native CT and model crop
Q25% · z=93

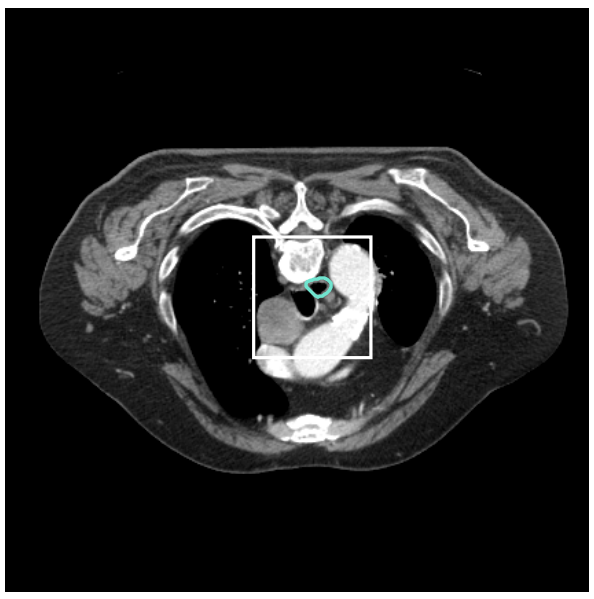

3-slice ENet
Q25% · z=93

3-slice ENet + refinement
